

We are a young, growing company that is committed to animal welfare and environmental protection. We offer ethical alternatives to animal testing for toxicology tests.

For our cell culture laboratory, located in Winterthur/Hegi,
we are looking for a

Technician (f/m/d) for cell biology (80-100%)

This position entails:

- Cultivation of various fish cell lines and cell quality control
- Establishment and maintenance of a permanent cell stock
- Planning and preparation of cells for toxicological experiments
- Material and laboratory organization and management

Your profile:

- Training as a biology laboratory technician or similar field
- Enthusiastic about high quality (routine) lab work
- Team player and able to work independently
- Able to communicate in spoken and written English (German or French would be an asset)
- Proficient computer skills in the common Office palette
- Prior experience in a GLP certified lab would be an advantage

We offer:

- Innovative and dynamic work environment, dedicated to animal-free chemical risk assessment and environmental protection
- A great learning environment with state-of-the-art instrumentation, technology development and project execution, including under GLP

Interested? Please send your complete application in one coherent PDF file, including a letter of motivation and the names of two references, to Dr. Mario Schirmer (mario.schirmer@aquatox-solutions.ch). We will review incoming applications on an ongoing basis until the position is filled.
